

Azure Administrator Interview Questions

1. What is Azure Active Directory (Azure AD)?
2. What are Azure resources?
3. What is table storage in Windows Azure?
4. What is table storage in Windows Azure?
5. Can we setup VMSS after creation of VM in azure?
6. What is the difference between a public and private cloud?
7. Explain IAAS, PAAS, SAAS
8. Is it possible to get a public DNS or IP address for the Azure Internal Load Balancer?
9. What can be the max. CIDR value while creating Subnet inside Vnet?
10. In case my Azure File share is not connecting so what troubleshooting I will perform?
11. What are the different types of Storage accounts in Windows Azure?
12. When do we setup conditional access policy in Azure? How to setup conditional access policy?
13. How to verify if MFA is enabled for tenant/ users or not?
14. How to use custom DNS in Azure portal?
15. Can we host our own DHCP server in Azure portal inside a VM?
16. When should you use a static IP address in Azure?
17. What are the redundancy options in Azure Storage?
18. Explain – LRS, GRS and ZRS.
19. What is the difference between hot, cold and archive access tiers?
20. What is the difference between VMSS and Availability sets?
21. What are the VM instance types offered by Azure?
22. How can be setup and monitor resources in Azure?
23. How is Windows Active Directory and Azure Active Directory different?
24. How to reset VM admin password?
25. How to add a data disk in a VM? Can we do it in running VM?
26. Can we increase the size of VM or OS disk? Is it possible on running VM?

27. How can we check the public IP of a VM, can we change it?
28. How to make Public and private IP static?
29. How to check private IP of VM via portal? Can we change it?
30. What is the difference among OS, temporary and data disk?
31. How to initialize the disk from VM?
32. Difference between redeploy and re-apply?
33. What is Azure Bastion? Explain the advantages of Bastion.
34. How to disassociate the Public IP of a VM? If we have made a connection to a VM via public IP and then we disassociate the public IP will the connection retain or not?
35. What is the difference between Horizontal and vertical scaling?
36. What is the difference between Regional and Global peering?
37. Explain Gateway Transit?
38. How to setup Azure Virtual WAN?
39. What is the limitation of storing the BLOB data in Azure storage account?
40. Difference between Regional and Global tier in public IP?
41. Can we associate a regional tier public IP with a VM which is available in different region?
42. How to check which VM is part of which Vnet?
43. If I delete the peering from one end then is it going to delete another end of peering automatically?
44. How to check active VM connection using VNet?
45. Explain P2S and S2S connection?
46. How to setup P2S and S2S connection?
47. What is App Service?
48. What is the difference between App Service and App Service Plan?
49. What kinds of App service plan are available ?
50. What type of applications can be deployed in App Service?
51. What is the difference between Access keys, SAS and Stored access policy?
52. How to provide permission to a user through SAS?
53. What are the advantages of SAS over Access key method?

54. In case my access keys and SAS gets compromised, how can I ensure the data integrity?
55. What is rehydration policy for archive access tiers?
56. What is the difference between incremental and differential backup? Explain its advantages and disadvantages
57. What is the process of taking the On premises backup on Azure RSV? How does MARS work?
58. What is Azure Site recovery services?
59. What is failover and failback process in ASR?
60. What is MFA? How to set up MFA in Azure?
61. How to create dynamic user groups and dynamic device groups in Azure?
62. What is custom domain? How to configure custom domain id?
63. What is self service password reset option in Azure?
64. What kind of monitoring we can do through metrics?
65. I am not able to access my VM. How to fix it?
66. How will you troubleshoot high consumption CPU in Azure?
67. Explain FSMO roles and procedure of transfer and seize
68. My VM connection is frequently getting disconnected, how will you fix it?
69. My S2S VPN is getting disconnected, how to fix it?
70. I am not able to establish a connection with my P2S gateway. How to fix it?
71. My P2S connectivity is slow. How to fix it?
72. What can be the various reasons of backup failure and in case one fails how will you fix it?
73. Connectivity has been broken between 2 VM's . How will you troubleshoot it?
74. I am not able to setup S2S VPN connectivity? How to fix it.
75. Can we change the frontend IP from Load balancer?
76. What is the difference between Azure load balancer and Application gateway?
77. What is the use of traffic manager and explain different routing methods for traffic manager profile?
78. I am not able to delete my RSV and getting the error. How will you fix it?
79. I am unable to delete my VM which is the part of VMSS. How to delete it?

80. Explain the concept of Azure firewall and how to setup DNAT and NAT to access the VM's without public IP?
